

FEMALE PSYCHOPATHY IS EITHER AS COMMON OR MORE COMMON THAN MALE PSYCHOPATHY (ANTI-PERSONALITY DISORDER- APD)-by Anonymous

Opening Statement

This is a serious compiling of studies and known traits of psychopaths, and how they think and function but presented in a more casual format. By noticing the usual traits of women and their sexual selection, it is likely that the average woman naturally displays a mild form of psychopathy at it's least, and more extreme forms of it at it's most.

PSYCHOPATHY

Let us define psychopathy first by generally shared traits.

- >Liars, cheaters, thieves, abusers, and manipulators
- >Low sense of fear and often seek out dangerous situations for thrills
- >Hedonistic, very impulsive and can be either sadistic and/or masochistic

- >Will seek out partners who actually displays such traits as themselves
- >very superficial, no greater sense of morality and does not see importance of moral boundaries even if they do properly grasp it
- >more likely to be criminals, whether violent criminals or non-violent

<https://en.wikipedia.org/wiki/Psychopathy>

MALE ATTRACTION TOWARDS UNHINGED WOMEN

Men who are also more psychopathic are drawn towards BPD (Borderline personality disorder) or APD in women who are physically attractive as well. <https://www.sciencedirect.com/science/article/abs/pii/S0191886920301537>

Which this paper will show that men who are attracted towards those sorts of women are often psychotic/mentally-unusual as well. <https://onlinelibrary.wiley.com/doi/abs/10.1111/jopy.12394>

FEMALE PSYCHOPATHY

It is true that most serial killers and infamous criminals are more likely to display psychopathic traits, not ALL psychopaths are violent thugs or cold-calculating killers.

Psychopathy can take form in non-violent ways, such as using sex as an asset to ascend to higher positions in their careers or seeming like an vulnerable and innocent woman to lure in unsuspecting victims.

<https://www.insider.com/male-and-female-psychopaths-how-they-are-different-2018-9>

Good looks are an edge in terms of securing positions as well as ascending within the business world.

https://www.hofstra.edu/pdf/orsp_shahani-denning_spring03.pdf

And women are very keen to use this as well as sex towards their advantage.

GENDER BIAS AND PSYCHOPATHY

Women are known to be nurturing to their children, but this is due to the fact that psychopaths see children as their own possessions or merely tools to meet their own ends.

However this is further from the truth, women are **MORE LIKELY** to abuse their children than males. Physically and emotionally.

<http://www.breakingthescience.org/SimplifiedDataFromDHHS.php>

Science is corrupted, as academics and professors are warping statistics to show that women do not display as much anti-social tendencies as men. Which is in fact a blatant lie.

<http://avoiceformalestudents.com/wp-content/uploads/2013/08/Strauss-Concealing-and-distorting-female-DV.pdf>

Like previously shown via this source,

<https://en.wikipedia.org/wiki/Psychopathy> psychopaths are often pulled from prisons for physically violent offenses. Which male psychopathy is displayed physically. Which the results that male psychopathy is more common than female psychopathy is so biased it is a total embarrassment for statistics, reliable studies, and the field of psychology.

Psychopathy is expressed differently, are you the drug-dealing thug or are you the woman who became the CEO of a corporation who divorced a wealthy king by using sex as an asset?

How we detect psychopathy is needed to be changed, by doing so we might see a drastic spike in psychopathy that is noted within female populations.

THE BAD BOYS AND FEMALE SEXUAL SELECTION

<https://onlinelibrary.wiley.com/doi/abs/10.1111/jopy.12394>

<https://mensvariety.com/psychopath-men-attractive/>

Psychopathy is only attractive towards other psychopaths. But wait a moment, don't women usually like "bad boys?" Yes, which implies that women are very likely to be psychopathic, more so than men. As their sexual selection deems it so, like attracts like.

Psychopaths have no true care of character and integrity. Which is like women prefer looks over "personality" in terms of short-term relationships and who will father their offspring.

WOMEN'S DECISION MAKING

A psychopath's decision making is more centered on their own personal success, instead of what is beneficial for society as a whole.

<https://www.cambridge.org/core/journals/british-journal-of-political->

[science/article/gender-differences-in-vote-choice-social-cues-and-social-harmony-as-heuristics/DB58CD40104BABA70AF2917DD5C89AF4](#)

Women are more likely to vote for what the public is considered be a more viable party, instead of doing their own research and deciding on their own in determining a more reliable office-runner for a position.

Which in short, women vote for more socially acceptable can based on their own social success. Which is their whole decision making process in general.
